*****FOR IMMEDIATE RELEASE*****

NEW FRANKEN, WI – 2/1/2018

Dental Health Products, Inc. (DHPI) announces new partnership with Weave.

Weave provides the tools needed to create natural, meaningful interactions with practices' patients.

- Screen pop: Get instant access to the information needed to provide the best client experience possible.
- See scheduled/missed appointments: By prompting with outstanding tasks, Weave ensures that offices never miss an opportunity to schedule an appointment, collect a balance, or even schedule appointments with other members of patients' family.
- Conversational Text Messaging: Text in whatever conversational style feels most natural, so patients always feel heard and personalized. Send messages from desktops or from mobile devices or set up personalized test messages in advance.

Weave helps improve practices' efficiency and efficacy with tools for in and out of office.

- Reviews App: Increase the practice online search presence and grow revenues with reviews from patients. Automate review invitations for each patient after their appointment, and then make sure their reviews are automatically posted online.
- Reports: View call data, such as calls answered and missed, call tracking, daily call volumes, and call source, and then filter and analyze that data to help improve office productivity.
- Scheduling App: View appointment calendars from whenever, wherever. Check the status of each appointment and call or text patients to personally confirm appointments, or to follow up on their condition and discuss future treatment plans.
