

DEXIS™ IS 3800

The DEXIS IS 3800 premium wired scanner is a game-changer for dental professionals, thanks to its compact and ultra-lightweight design by Studio F. A. Porsche which offers optimal ergonomics and a high-speed scanning experience. IS 3800 is powered by IS ScanFlow which redefines and simplifies how you scan, diagnose and communicate with your patients.

Ultra-lightweight and compact

Weighing only 190 grams, the IS 3800 is one of the lightest intraoral scanners in the market with a compact form factor that fits comfortably in your hand.

Super-fast scanning

With a proven scanning time of 25 seconds for a single arch*, the IS 3800 captures dual arch scans with ease and frees up more time for focusing on patients.

A smooth scanning experience

The large 16 mm x 14 mm field-of-view and broad depth of field capture the details you need.

Gesture motion control

The IS 3800 handpiece lets you orient the digital model on screen by simply rotating the scanner, eliminating the need to use the mouse.

Simplify your scanning

Interchangeable tips

Three styles are provided to optimize scanning comfort. The tips can be autoclaved up to 110 times, reducing consumable costs and ensuring proper sterilization.

Expansive workflows

Revolutionary workflow allows the user to navigate freely among different clinical applications in a single scan.

Combine with the IS Voyager configuration for optimal mobility. IS Voyager is a sleek, flexible and ergonomic mobile trolley combined with the IS All in One computer that enables convenient intraoral scanning and enhanced patient engagement—*right at the chair*.

Powered by the PC

With its USB Type-C connection, the IS 3800 derives its power directly from the computer without the need for additional power cables.

Open system capability

Easily transfer STL, PLY, OBJ, xOrder for DWOS, and Dentalproject for exocad files to your lab.

*In vitro test performed on a stone model.
