

LIGHTER WEIGHT & FLOW AI TECHNOLOGY NOW ARRIVING

INTRODUCING evolve scan

GLOBAL TECHNOLOGY, UNPARALLELED LIGHTNESS AND INTELLIGENT FLUIDITY IN INTRAORAL SCANNING

The Evolve Scan is the lightest intraoral scanner on the market, weighing only 119g, and was designed to transform the digital experience in dental offices and clinics.

Combining ergonomics, performance, and artificial intelligence, it provides faster, more accurate, and intuitive scans from start to finish.

Furthermore, Evolve Scan uses the same software as other devices in the imaging line, allowing for complete integration into the clinic's digital workflow. This ensures greater agility, organization, and consistency between exams, unifying care with efficiency and national technology.

FLOW AI

With Flow AI technology, Eagle Scan automatically ignores unwanted structures, such as cheeks and tongue, optimizing scanning time and ensuring more fluidity and comfort during the procedure.

EVOLVE SCAN FEATURES

- New model that is the lightest weight available (4.2oz.)
- Single, detachable USB-C cable for easy use and replacement
- Uses Flow AI technology to optimize scan time and ensure fluidity
- 2 control button operation for still image capture and step advancement
- Replaceable tip is autoclavable up to 250 times

AI-POWERED, OPEN-FORMAT SOFTWARE

Evolve Scan operates with intuitive and comprehensive global software. The software and its updates are included* and is compatible with open formats (CAD/CAM), perfect for integration with laboratories.

*With equipment purchase. Not applicable to subscription plans.
