### **1** Identification of the substance/mixture and of the company/undertaking

#### · Product identifier

· Trade name: CLEARFIL CERAMIC PRIMER

- · Article number: US117
- · Application of the substance / the preparation Adhesive, dental ceramic

#### · Details of the supplier of the safety data sheet

· Manufacturer:

Kuraray Noritake Dental Inc. 1621 Sakazu, Kurashiki, Okayama 710-0801, Japan · Contact information:

Kuraray America, Inc. 33 Maiden Lane, 6th Floor, New York, NY 10038 U.S.A. Tel: 800-879-1676 Fax: 888-700-5200 Website: www.kuraraydental.com

#### 2 Composition/information on ingredients

#### · Chemical characterization: Single Component

· Description: Mixture of substances listed below with nonhazardous additions.

#### · Dangerous components:

64-17-5 ethanol	>80%
🛞 H225	
2530-85-0 3-trimethoxysilylpropyl methacrylate H311; (1) H315; H319; H335; H227	< 5%
🛞 H311; 🐠 H315; H319; H335; H227	
• Other ingredients: 10-Methacryloyloxydecyl dihydrogen phosphate	

#### **3 Hazards identification**

#### · Classification of the substance or mixture

GHS02 Flame

- H225 Highly flammable liquid and vapour.
- Classification according to Directive 67/548/EEC or Directive 1999/45/EC

#### Highly flammable

Highly flammable.

#### Information concerning particular hazards for human and environment:

- The product has to be labelled due to the calculation procedure of international guidelines.
- **Classification system:**
- The classification was made according to the latest editions of international substances lists, and expanded upon from company and literature data.

#### · Label elements

#### · GHS label elements

- The product is classified and labelled according to the Globally Harmonized System (GHS).
- · Hazard pictograms GHS02
- · Signal word Danger
- · Hazard statements
- H225 Highly flammable liquid and vapour.
- · Precautionary statements
- P210 Keep away from heat/sparks/open flames/hot surfaces. - No smoking.
- P241 Use explosion-proof electrical/ventilating/lighting/equipment.

#### (Contd. of page 1) P280 Wear protective gloves/protective clothing/eye protection/face protection. Ground/bond container and receiving equipment. P240 P303+P361+P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower. P501 Dispose of contents/container in accordance with local/regional/national/international regulations. · Classification system: · NFPA ratings (scale 0 - 4) Health = 0Fire = 3Reactivity = 0· HMIS-ratings (scale 0 - 4) HEALTH • Health = 0FIRE 3 Fire = 3REACTIVITY 0 Reactivity = 0

## 4 First aid measures

- · After inhalation: Supply fresh air; consult doctor in case of complaints.
- $\cdot$  After skin contact: Immediately rinse with water.
- After eye contact: Rinse opened eye for several minutes under running water. Then consult a doctor. After swallowing:
- Do not induce vomiting; immediately call for medical help.
- If symptoms persist consult doctor.

## **5 Firefighting measures**

· Suitable extinguishing agents:

- CO2, extinguishing powder or water spray. Fight larger fires with water spray or alcohol resistant foam.
- Special hazards arising from the substance or mixture No further relevant information available.
- · Protective equipment:
- Wear self-contained respiatory protective device.
- Wear fully protective suit.

## 6 Accidental release measures

- Personal precautions, protective equipment and emergency procedures
- Wear protective equipment. Keep unprotected persons away.
- Environmental precautions:
- Dilute with plenty of water.
- Do not allow to enter sewers/ surface or ground water.
- Methods and material for containment and cleaning up:
- Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Ensure adequate ventilation.
- · Reference to other sections
- See Section 7 for information on safe handling.
- See Section 8 for information on personal protection equipment.
- See Section 13 for disposal information.

## 7 Handling and storage

#### · Handling:

- · Precautions for safe handling Ensure good ventilation/exhaustion at the workplace.
- · Information about protection against explosions and fires:
- Keep ignition sources away Do not smoke.
- Protect against electrostatic charges.
- · Storage:
- Requirements to be met by storerooms and receptacles: Store in a refrigerator (2-8°C).
- · Information about storage in one common storage facility:
- Store away from oxidizing agents.
- Store away from reducing agents.
- Further information about storage conditions: Keep receptacle tightly sealed.
- Store in cool, dry conditions in well sealed receptacles.
- Protect from heat and direct sunlight.
- Specific end use(s) No further relevant information available.

#### 8 Exposure controls/personal protection

• Additional information about design of technical systems: No further data; see item 7.

#### $\cdot$ Components with limit values that require monitoring at the workplace:

#### 64-17-5 ethanol

- PEL 1900 mg/m3, 1000 ppm
- REL 1900 mg/m<sup>3</sup>, 1000 ppm
- TLV 1880 mg/m<sup>3</sup>, 1000 ppm
- Additional information: The lists that were valid during the creation were used as basis.
- · Personal protective equipment:
- · General protective and hygienic measures: Wash hands before breaks and at the end of work.
- Breathing equipment: Not required.
- · Protection of hands:

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

· Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

· Penetration time of glove material

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

• Eye protection:

### 1 Identification of the substance/mixture and of the company/undertaking

#### · Product identifier

· Trade name: PANAVIA F 2.0 ED PRIMER 2 B

- · Article number: 070-B
- · Application of the substance / the preparation Dental material for tooth surface conditioning

#### · Details of the supplier of the safety data sheet

· Manufacturer:

Kuraray Noritake Dental Inc. 1621 Sakazu, Kurashiki, Okayama 710-0801, Japan • **Contact information:** Kuraray America, Inc.

33 Maiden Lane, 6th Floor, New York, NY 10038 U.S.A. Tel: 800-879-1676 Fax: 888-700-5200 Website: www.kuraraydental.com

#### 2 Composition/information on ingredients

#### $\cdot$ Chemical characterization: Single Component

- · Description: Mixture of substances listed below with nonhazardous additions.
- · Dangerous components: Void
- Other ingredients:

N-Methacryloyl-5-aminosalicylic acid Water Catalysts Accelerators

#### **3 Hazards identification**

- $\cdot$  Classification of the substance or mixture
- The product is not classified according to the Globally Harmonized System (GHS).
- · Classification according to Directive 67/548/EEC or Directive 1999/45/EC Not applicable.
- · Information concerning particular hazards for human and environment:
- The product does not have to be labelled due to the calculation procedure of international guidelines. **Classification system:**

The classification was made according to the latest editions of international substances lists, and expanded upon from company and literature data.

#### · Label elements

- · GHS label elements Void
- · Hazard pictograms Void
- · Signal word Void
- · Hazard statements Void

#### 4 First aid measures

- · After inhalation: Supply fresh air; consult doctor in case of complaints.
- · After skin contact: Generally the product does not irritate the skin.
- After eye contact: Rinse opened eye for several minutes under running water.
- · After swallowing: If symptoms persist consult doctor.

(Contd. of page 1)

#### **5** Firefighting measures

- · Suitable extinguishing agents:
- CO2, extinguishing powder or water spray. Fight larger fires with water spray or alcohol resistant foam.
- Special hazards arising from the substance or mixture No further relevant information available.
- · Protective equipment: No special measures required.

## 6 Accidental release measures

- · Personal precautions, protective equipment and emergency procedures Not required.
- $\cdot$  **Environmental precautions:** Dilute with plenty of water.
- $\cdot$  Methods and material for containment and cleaning up:
- Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).
- $\cdot$  Reference to other sections No dangerous substances are released.

## 7 Handling and storage

- · Handling:
- · Precautions for safe handling No special measures required.
- Information about protection against explosions and fires: No special measures required.
- · Storage:
- Requirements to be met by storerooms and receptacles: Store in a refrigerator (2-8°C).
- $\cdot$  Information about storage in one common storage facility: Not required.
- $\cdot$  Further information about storage conditions: None.
- $\cdot$  Specific end use(s) No further relevant information available.

#### 8 Exposure controls/personal protection

- Additional information about design of technical systems: No further data; see item 7.
- · Components with limit values that require monitoring at the workplace:
- The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.
- Additional information: The lists that were valid during the creation were used as basis.
- · Personal protective equipment:
- $\cdot$  General protective and hygienic measures:
- The usual precautionary measures for handling chemicals should be followed.
- Breathing equipment: Not required.
- · Protection of hands:

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

· Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

• Penetration time of glove material

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

## **10 Stability and reactivity**

 $\cdot$  Thermal decomposition / conditions to be avoided:

- No decomposition if used and stored according to specifications.
- Incompatible materials: No further relevant information available.
- $\cdot$  Hazardous decomposition products: Carbon monoxide and carbon dioxide

## 11 Toxicological information

## $\cdot$ Acute toxicity:

· LD/LC50 values that are relevant for classification:

## 67-64-1 acetone

Oral LD50 5800 mg/kg (rat)

Dermal LD50 20000 mg/kg (rabbit)

- · Primary irritant effect:
- on the skin: No irritant effect.
- $\cdot$  on the eye: Irritating effect.
- $\cdot$  Sensitization: No sensitizing effects known.
- $\cdot$  Additional toxicological information:

The product shows the following dangers according to internally approved calculation methods for preparations:

Irritant

## **12 Ecological information**

- $\cdot$  Aquatic toxicity: No further relevant information available.
- $\cdot$  Persistence and degradability No further relevant information available.
- $\cdot$  Behavior in environmental systems:
- Bioaccumulative potential No further relevant information available.
- · Additional ecological information:
- · General notes:
- Water hazard class 1 (Self-assessment): slightly hazardous for water

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

## **13 Disposal considerations**

#### · Waste treatment methods

- · Recommendation:
- Must not be disposed of together with household garbage. Do not allow product to reach sewage system.
- · Uncleaned packagings:
- $\cdot$  **Recommendation:** Disposal must be made according to official regulations.
- · Recommended cleansing agent: Water, if necessary with cleansing agents.

## 1 Identification of the substance/mixture and of the company/undertaking

#### · Product identifier

· Trade name: PANAVIA F 2.0 PASTE B

- · Article number: 089-PB
- · Application of the substance / the preparation Resin-based dental adhesive cement

#### · Details of the supplier of the safety data sheet

· Manufacturer:

Kuraray Noritake Dental Inc. 1621 Sakazu, Kurashiki, Okayama 710-0801, Japan • **Contact information:** Kuraray America, Inc. 33 Maiden Lane, 6th Floor, New York,

NY 10038 U.S.A. Tel: 800-879-1676 Fax: 888-700-5200 Website: www.kuraraydental.com

#### 2 Composition/information on ingredients

#### $\cdot$ Chemical characterization: Single Component

 $\cdot$  **Description:** Mixture of substances listed below with nonhazardous additions.

#### · Dangerous components:

7681-49-4 sodium fluoride

☑ T R25; X Xi R36/38
 R32
 ♦ H301; (1) H315; H319

#### **Other ingredients:**

Hydrophobic aromatic dimethacrylate Hydrophobic aliphatic methacrylate Hydrophilic aliphatic dimethacrylate Silanated barium glass filler Catalysts Accelerators Pigments Others

#### **3 Hazards identification**

Classification of the substance or mixture
GHS07
H302 Harmful if swallowed.
Classification according to Directive 67/548/EEC or Directive 1999/45/EC
Xn; Harmful
R22: Harmful if swallowed.
R31: Contact with acids liberates toxic gas.
Information concerning particular hazards for human and environment: The product has to be labelled due to the calculation procedure of international guidelines.
Classification system: The classification was made according to the latest editions of international substances lists, and expanded upon from company and literature data.

#### 4 First aid measures

· General information:

Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.

- · After inhalation: Supply fresh air; consult doctor in case of complaints.
- · After skin contact: Generally the product does not irritate the skin.
- After eye contact: Rinse opened eye for several minutes under running water.
- After swallowing: Immediately call a doctor.

#### **5** Firefighting measures

· Suitable extinguishing agents:

CO2, extinguishing powder or water spray. Fight larger fires with water spray or alcohol resistant foam.

- Special hazards arising from the substance or mixture No further relevant information available.
- · Protective equipment:
- Mouth respiratory protective device.
- Wear fully protective suit.

## 6 Accidental release measures

 $\cdot$  Personal precautions, protective equipment and emergency procedures

Mount respiratory protective device.

- · Environmental precautions: Do not allow to enter sewers/ surface or ground water.
- · Methods and material for containment and cleaning up:
- Dispose contaminated material as waste according to item 13.
- Reference to other sections
- See Section 7 for information on safe handling.
- See Section 8 for information on personal protection equipment.
- See Section 13 for disposal information.

## 7 Handling and storage

- · Handling:
- Precautions for safe handling Prevent formation of dust.
- Information about protection against explosions and fires: No special measures required.

· Storage:

• Requirements to be met by storerooms and receptacles: Store in a refrigerator (2-8°C).

 $\cdot$  Information about storage in one common storage facility:

Do not store together with acids.

Store away from oxidizing agents.

Store away from reducing agents.

## Further information about storage conditions:

Keep receptacle tightly sealed.

Store in cool, dry conditions in well sealed receptacles.

Protect from heat and direct sunlight.

Specific end use(s) No further relevant information available.

#### 8 Exposure controls/personal protection

- Additional information about design of technical systems: No further data; see item 7.
- · Components with limit values that require monitoring at the workplace:

The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.

- Additional information: The lists that were valid during the creation were used as basis.
- · Personal protective equipment:
- · General protective and hygienic measures: Wash hands before breaks and at the end of work.

#### · Breathing equipment:

In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use respiratory protective device that is independent of circulating air.

· Protection of hands:

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

#### Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

#### · Penetration time of glove material

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

• Eye protection: Not required.
