PRECAUTIONS TO CONSIDER: Persons developing hypersensitivity (anaphylactic) reactions must receive immediate medical attention. Individuals with previous history of significant allergy (especially to antibiotics) and/or asthma should avoid potential exposure to this material. Individuals hypersensitive to one tetracycline or tetracycline derivative may be hypersensitive to other tetracyclines also. Material may be irritating to mucous membranes and respiratory tract. As a general rule, when handling USP Reference Standards avoid all contact and inhalation of dust, fumes, mist, and/or vapors associated with the material. Keep container tightly closed and use with adequate ventilation; wash thoroughly after handling. Individuals working with chemicals should consider all chemicals to be potentially hazardous even if their individual hazards may be uncharacterized or unknown.
