NEW FRANKEN, WI— October 4, 2012. Dental Health Products, Inc. (DHPI) showcased three new vendors at its National Sales Meeting in July -- Keurig/Green Mountain Coffee, Surgical Esthetics and Medentex. Each company brings something new and exciting to DHPI's product line.

Keurig/Green Mountain Coffee is known for its innovative Keurig coffee makers. DHPI carries the B140, B150 and B300SE models and over 200 varieties of gourmet coffee in single serving K-Cups. Now you can brew your favorite cup of coffee in under one minute without waste, mess or fuss.

Surgical Esthetics is breaking new ground with its bone and amniotic liquid allograft materials. Derived from humans, these materials regrow bone faster than bovine materials currently on the market. Bone regeneration is important for a number of reasons including the installation of dental implants.

Medentex is a leader in amalgam recycling. The Medentex Amalgam Separator effectively captures and contains amalgam particles from the dental office's wastewater system, so that mercury isn't released into the ecosystem. Once collected the amalgam is recycled for use in other industries. With Medentex being "green" is easier than ever.

"We are pleased to partner with Keurig/Green Mountain Coffee, Surgical Esthetics and Medentex," states Steve Desautel, V.P. Sales & Marketing. "Their innovative products and services will provide many benefits to our customers."

Dental Health Products, Inc. is a full-service distributor of dental supplies and equipment with two distribution warehouses and seven full service branch locations. DHPI is considered one of the top dental distributors in the U.S. It offers full-line equipment sales, installation and service, hand-piece and small equipment repair, office design, digital equipment and integrated practice management software, inventory control products, and dedicated and personalized account management.
